### Yany BooStar<sup>◇</sup>

#### Yany BooStar<sup>◇</sup> Set Details

The Yany BooStar is capable of enhancing resonance and delivering a thicker tonal palette. When installed, it also allows you to set just the right amount of resistance and achieve smoother breath control. Your horn will have more tonal focus and volume in all registers. Different combinations of the three screws in the set facilitate changes in tonal quality and the playing experience, enabling you to adjust for different

musical genres and settings. In addition to the standard un-plated set, the Yany BooStar is also available in a new gold-plated (GP) version for richer tonal harmonics and depth as well as a pink-gold-plated (PGP) version for a mellower sound. Open the door to a new age and customize your voice with flexible combinations of these finishes and use-patterns. (See photos for installation examples.)

### Yany BooStar<sup>◇</sup>
